

### DOI Work Activity G0: Monitor Grazing Allotments

<b>Program Area:</b>	Resource Use – FORAGE
<b>End Outcome Goal:</b>	UEO 3 – LAND-RELATED RESOURCES – Manage or Influence Resource Use to Enhance Public Benefit, Responsible Development, and Economic Value
<b>Intermediate Outcome:</b>	UIO 3.2 (Forage) – Enhance Responsible Use Management Practices
<b>DOI Sub process:</b>	1a - Collect data (conduct inventories, surveys, monitoring)

**Examples/Notes:** NOTE: Monitoring is reported when all scheduled monitoring, as defined in the allotment monitoring plan, is completed in the Fiscal Year. For example, if the allotment monitoring plan calls for three trend plots to be read, actual use to be collected, or utilizations to be read, then report one allotment monitored when all studies are collected and documented for the year. Or if the schedule only requires doing a utilization study for the year then report one allotment monitored upon completion and documentation of the study. For each field office (name and number), enter allotment name & number, enter acres monitored, enter date monitoring was completed, and enter type of management plan (AMP's, CRMP's, etc.), if it applies.

**Work Activity Description:** Grazing Allotments Monitored includes all costs associated with allotment monitoring, such as planning for monitoring, data gathering, field and office labor, GIS support, data management support, contracts/interagency agreements and equipment purchase/lease/rental.

Allotment monitoring relates specifically to data collection needed to analyze the effectiveness of management practices, restoration measures or project/treatments in achieving and/or measuring movement toward land use objectives and/or rangeland health standards. It includes any form of reoccurring data collection that will assist in characterizing the allotment, such as vegetation production, utilization, use pattern mapping and actual use.

This does not include the analysis, interpretation and evaluation of the data, or determination of whether rangeland health standards are achieved.

<b>Output:</b> Allotments monitored	<b>Unit of Measure:</b> Number of Allotments Monitored.  Complete Monitoring Report when all of the various data collection has occurred on the allotment. Report only once during the report year regardless of the number of different types of studies made or the data collected. Provide allotment monitored information to the National Science and Technology Center by October 15 to obtain credit for previous fiscal year work accomplished. The information will be summarized in the annual "National Rangeland Inventory, Monitoring, and Evaluation Report."
<b>Inputs:</b> -	<b>Cost Drivers:</b>

**System Interfaces:** None. (MIDAS will be used when available)
